

ADDING VALUE TO YOUR BUSINESS

System Integration

Customized industrial system solutions

System Integration brings a series of integral systems and networks together, adding value to all components by sharing resources and simplifying processes. This leads to cost, time and workforce savings for your operations.

Why SPS?

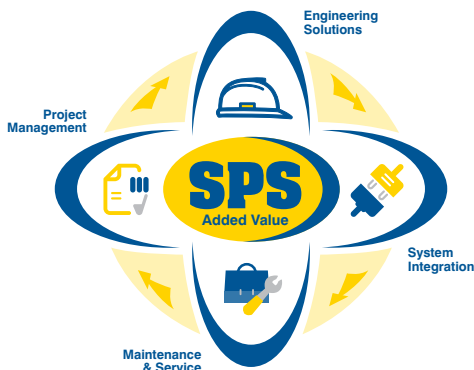

Choose SPS to integrate your systems and you're guaranteed to have professional service and custom solutions, ensuring the very best in functionality.

With our highly experienced technicians, SPS's integration services can complete in-house instrument installations, providing a wide range of products, including safety systems, analyzer sample conditioning systems and control panels customized to your specifications.

We also provide third-party inspection and certification for all of your needs.

PLC cabinet

About SPS

With more than 35 years of experience, SPS is one of North America's leading industrial solutions businesses. We excel at producing and servicing plastic lined piping, instrumentation and safety products to a wide range of industries, including Petrochemical, Refinery, Pulp and Paper, Food and Drug, Power, Mining, Water Treatment, Automotive, Manufacturing, Natural Gas and Nuclear.

ADDING VALUE TO YOUR BUSINESS
